VALLEY

Field Commander®

Remotely Monitor and Control Your Irrigation.

The industry-leading Valley® Field Commander® incorporates patented GPS technology to remotely monitor and control irrigation systems on the AgSense® platform.

It works on any web-connected smartphone, tablet or computer, and provides real-time information and up-to-the-minute alarms via email or text message. Because it's the best, Field Commander is installed on more pivots than all other brands combined.

Field Commander Features:

- Compatibility with center pivot and linear machines
- Cable theft monitoring and alerts
- Comprehensive management and irrigation reporting
- Single or Dual Stop-In-Slot (Stop Angles)
- Auto Restart via remote program controls
- Crash Zone/Overlap Alerts
- Ability to program multiple Timed Start and Timed Stop Commands
- Remote Speed Override

Field Commander®

Field Commander Benefits:

- Saves time and money by turning a smartphone, tablet or desktop computer into a virtual control panel that can monitor and control from anywhere in the world.

- Economically provides the functionality of a digital panel while still working with any brand of pivot or linear.

- Manages a mixed fleet of hydraulic and electric pivots, bringing them to a single web dashboard.

- Sets machine speed by choice of: Percent Timer, Pivot Angle, Application Rate, Hours per Revolution, or Hours to Stop Angle.
